Please confirm the ICB holds the following data and where it is held; please provide the data as requested. I would like to receive this information by email.

- 1. Please outline how adult (>18-years-old) Type 2 diabetes care is structured in the ICB, including how primary care, community care and secondary care services interact and the roles / responsibilities they each take. This can be a written summary by the commissioning lead for Type 2 diabetes, in a commissioning policy or a service map.**

Please be advised that the ICB does not hold the information in the formats requested. Diabetes care is delivered in line with NICE Guidance for management of type 2 diabetes in adults.
