

FOI-0424-815

1. Does the Integrated Care System have a data strategy in place, either as a standalone strategy or as part of a broader digital or BI strategy? If yes, please provide a copy.

Yes, the SSOT ICB Intelligence Strategy (please read as synonymous with a data / BI strategy) was presented to the SSOT ICB Board in March 2024. Please find attached.

2. Is the same/similar data set used for the Shared Care Record also used for any of the purposes set out in the table below? Please tick all that apply:

| Purpose  | Yes/No | Within Shared Record product? (Yes/No) | Via a different product or platform? (Yes/No) |
|--|--------|--|---|
| Other Direct Care purposes e.g. Cohort/caseload dashboards | Yes    | Yes                                    | Yes   |
| Proactive targeting of services                            | Yes    | Yes                                    | Yes   |
| Population Health Management                               | Yes    | Yes                                    | Yes   |
| Planning and improvement                                   | No     | No                                     | Yes   |
| Research and innovation                                    | No     | No                                     | Yes   |

3. Please provide a document illustrating the data flows for your ICS Shared Care Record. The table below illustrates the information required:

FOI-0424-815

| Type of data      | Source                   | Method        |
|-------------------|--------------------------|---------------|
| Acute hospital    | Provider                 | Data extract  |
| Mental Health     | Clinical System Supplier | Real-time API |
| Primary Care Data | Middleware supplier      | Real-time API |

The SSOT Shared Care Record (aka One Health and Care (OHC)) is a single instance supporting not only Staffordshire and Stoke-on-Trent, but also Shropshire, Telford and Wrekin as well as Black Country. The details re data flows from provider organisations and IT systems into OHC is shown below:
